

Research Leaders (KOL) Brief: GLP-1 / Obesity

A cited snapshot of the most active research leaders, institutions, and topics in this area, computed from recent PubMed records. Names are public academic authorship; every figure is verifiable by PMID.

Corpus: 2,991 PubMed papers (2021-2026) matching 'semaglutide OR tirzepatide OR GLP-1 receptor agonist obesity' . Source: NLM PubMed E-utilities . Generated July 21, 2026

Top research leaders (by recent publication volume in this area)

#	Researcher	Primary affiliation	Papers	Active
1	Sattar Naveed	University of Glasgow	16	2025-2026
2	Wu Jheng-Yan	Chi Mei Medical Center	16	2025-2026
3	Ji Linong	Peking University People's Hospital	13	2025-2026
4	Lincoff A Michael	Cleveland Clinic	11	2025-2026
5	Patoulas Dimitrios	Aristotle University of Thessaloniki	10	2025-2026
6	Lin Yu-Min	Chi Mei Medical Center	10	2025-2026
7	Rossing Peter	Steno Diabetes Center Copenhagen	10	2025-2026
8	Guo Jingchuan	College of Pharmacy	10	2025-2026
9	Lingvay Ildiko	University of Texas Southwestern Medical Center	10	2025-2026
10	Wharton Sean	University of Toronto	10	2025-2026
11	Rizzo Manfredi	University of Palermo	9	2025-2026
12	Koufakis Theocharis	Hippokration General Hospital	9	2025-2026
13	Stefanski Adam	Eli Lilly and Company	9	2026-2026
14	Busetto Luca	University of Padova	8	2025-2026
15	Muscogiuri Giovanna	Dipartimento di Medicina Clinica e Chirurgia	8	2025-2026
16	Loomba Rohit	University of California at San Diego	8	2026-2026
17	Khunti Kamlesh	University of Leicester	8	2026-2026
18	Hsu Chih-Wei	Kaohsiung Chang Gung Memorial Hospital and Chang Gung Univ	8	2025-2026
19	Lai Chih-Cheng	Chi Mei Medical Center	8	2026-2026
20	Barrea Luigi	Università Telematica Pegaso	7	2025-2026

Leading institutions (by author output)

Mayo Clinic (76), College of Medicine (74), Eli Lilly and Company (68), Novo Nordisk A/S (58), College of Pharmacy (51), University of Toronto (44), University of California (38), Brigham and Women's Hospital (33), Cleveland Clinic (31), University of Copenhagen (29)

Most active subtopics (MeSH)

Glucagon-Like Peptide-1 Receptor Agonists (713), Obesity (639), Semaglutide (551), Hypoglycemic Agents (550), Diabetes Mellitus, Type 2 (531), Glucagon-Like Peptides (463), Weight Loss (343)

Top journals

Diabetes, obesity & metabolism (185), Cureus (115), Obesity (Silver Spring, Md.) (42), International journal of molecular sciences (41), Frontiers in endocrinology (35), Journal of clinical medicine (33), Obesity surgery (24), Frontiers in pharmacology (23)

Publication momentum

2024: 1, 2025: 533, 2026: 2457

Method and honest limits

Built from 2,991 recent PubMed records matching the query above (free E-utilities). Ranking is by publication volume in this set. This free sample does NOT disambiguate identical author names, weight by citations, or map co-authorship networks or clinical-trial roles - a paid brief adds ORCID disambiguation, citation weighting, trial involvement, and contactable-affiliation verification. Names are public authorship record; no private contact data is included. Verify any researcher at pubmed.ncbi.nlm.nih.gov.

Want the full ranked KOL map for your exact indication, molecule, or region? Reply and we'll scope it.
